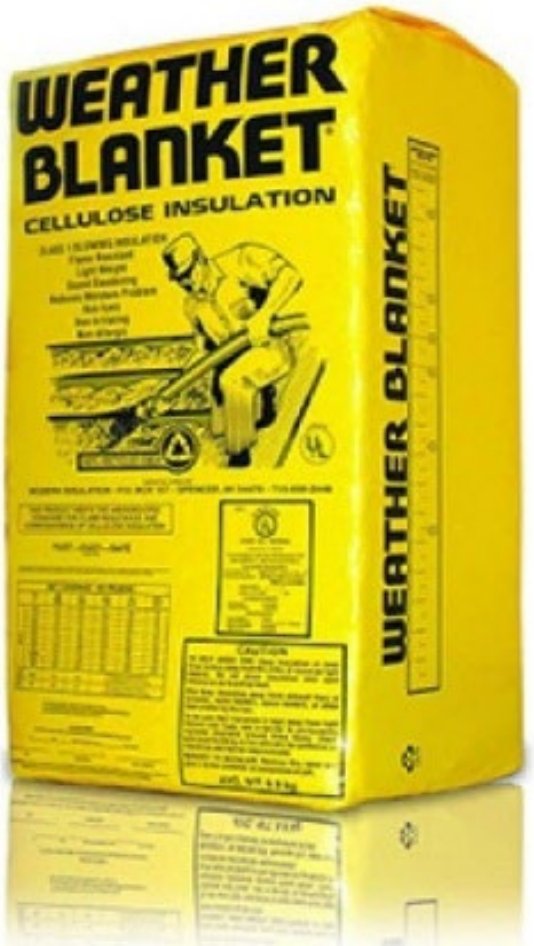
PRODUCT DATA SHEET

WEATHER BLANKET®

All Borate Loose-Fill Cellulose

For Loose-Fill, Dense Pack, Spray Applied Applications



COMPANY OVERVIEW

For nearly 50 years, Weather Blanket Insulation has been at the forefront of the insulation industry, providing high-quality cellulose insulation to homeowners and contractors alike. With two state-of-the-art manufacturing facilities, we ensure that our products are produced with the utmost precision and care. Our commitment to excellence and innovation has earned us a reputation for consistently producing reliable and effective insulation products. We serve a diverse customer base and proudly ship our products throughout the entire Midwest United States. We take pride in our long-standing history and our dedication to customer satisfaction.

QUALITY PLEDGE

Our cellulose insulation is crafted with precision and care, ensuring that every bag of Weather Blanket Insulation meets the highest standards of quality. We utilize state-of-the-art manufacturing processes and rigorous quality control measures to guarantee a product that performs exceptionally well in every application, including attics, dense pack walls and damp spray applications. When you choose our cellulose insulation, you're choosing a product that you can trust to deliver consistent results in both new construction and retrofit applications.

APPLICATION COVERAGE CHARTS • NET OF FRAMING • 22 LB. BAGS

The manufacturer recommends that the insulation be installed at these minimum thicknesses, maximum coverages, and minimum weights per square foot to provide the levels of insulation thermal resistance (R) shown. Actual coverage may be influenced by job conditions, machine settings, and applicator technique.

LOOSE-FILL AND STABILIZED ATTICS • Settled Density 1.4 lbs/cu.ft.

R-Value @ 75°F	Initial Installed Thickness (in.)	Minimum Settled Thickness (in.)	Net Coverage sq. ft./Bag	Bags Per 1,000 sq. ft.	Minimum Weight lbs./sq. ft.
13	4.4	3.9	64.1	15.6	0.34
19	6.0	5.4	40.4	24.8	0.54
22	6.9	6.2	34.1	29.3	0.64
26	8.1	7.2	27.6	36.2	0.79
30	9.3	8.3	23.4	42.7	0.93
38	11.6	10.4	18.0	55.5	1.21
40	12.2	10.9	16.9	59.2	1.29
44	13.4	12.0	15.1	66.2	1.44
49	15.0	13.4	13.3	75.2	1.64
55	16.8	15.0	11.7	85.5	1.87
60	18.3	16.3	10.5	95.2	2.07

DENSE PACKED SIDEWALLS & FLOORS • Assumes Dense Pack of 3.0 lbs/cu. ft.

R-Value @ 75°F	Initial Installed Thickness (in.)	Minimum Settled Thickness (in.)	Net Coverage sq. ft./Bag	Bags Per 1,000 sq. ft.	Minimum Weight lbs./sq. ft.
13.4	3.5	3.5	29.2	34.2	0.88
21	5.5	5.5	15.9	63.0	1.38
28	7.5	7.5	11.6	86.0	1.88

SPRAY APPLIED SIDEWALLS • Assumes Density of 2.75 lbs/cu. ft.

R-Value @ 75°F	Initial Installed Thickness (in.)	Minimum Settled Thickness (in.)	Net Coverage sq. ft./Bag	Bags Per 1,000 sq. ft.	Minimum Weight lbs./sq. ft.
13.4	3.5	3.5	27.5	37.0	0.80
21	5.5	5.5	17.5	58.0	1.26

Attic Initial Installed Thickness is based on ASTM C1374 using a Krendl 1000 Blowing Machine. Settled Density Coverage as determined by C1374 and C518. All coverage charts assume installer has netted out all wall openings and wood framing to calculate the amount of area to be insulated.

READ THIS BEFORE YOU BUY | What you should know about R-Values

The above chart shows the R- value of this insulation. R means resistance to heat flow. The higher the R-value, the greater the insulating power. Compare insulation R-values before you buy. There are other factors to consider. The amount of the insulation you need depends on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, and your fuel use patterns and family size. If you buy too much insulation, it will cost you more than what you'll save on fuel. To get the marked R-value, it is essential that this insulation be installed properly

Flame Resistant • Reduces Heat Transfer • Reduces Sound Transmission • Environmentally Friendly • Moisture Management • Non-Toxic • Itch-Free • Energy Saving • Easy Application • Great Value
